

REMARKS

Amendments filed after the date of filing an appeal under § 41.31(a)(1)-(3) and prior to the date a brief under § 41.37 is filed may be admitted as provided in § 1.116, i.e. "Amendments presenting rejected claims in better form for consideration on appeal may be admitted." It is noted that independent claims 1, 2, 4, 14 and 29 recite a reflective pixel electrode or conductive layer. Due to a typographical error, "reflective" was omitted from independent claim 28. The Applicants have amended claim 28 to correct this error by inserting "reflective" before "pixel electrode." The Applicants respectfully submit that the Amendment places claim 28 in better form for consideration on appeal, does not contain new matter and does not present any new issues for consideration by the Examiner. Therefore, the Amendment is believed to be appropriate for entry at this time.

Should the Examiner believe that anything further would be desirable to place this application in better condition for allowance, the Examiner is invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,

Eric J. Robinson
